

ABOUT XLBOOM

Founded in Antwerp in 1997 by Ann De Cock and Geert Jan Van Cauwelaert, XLBoom is a Belgian design brand known for its refined home accessories and contemporary objects. Driven by a passion for craftsmanship and thoughtful design, the brand creates objects that bring aesthetics into everyday life, both indoors and outdoors. With a clear design language and strong attention to materials, XLBoom develops collections that combine sculptural presence with everyday functionality.

XLBoom creates 'smart living objects': beautiful and functional by design. Rather than following trends, they identify what's missing in everyday life and respond with considered solutions. From a bouquet of flowers to an elegant dinner table: every object starts with a simple observation.

DESIGN & COLLABORATIONS

XLBoom collaborates with internationally recognized designers who translate the brand's philosophy into expressive yet functional objects. Among them are Alain Gilles, Frederik Delbart and Sascha Sartory, whose distinctive design languages contribute to the identity of the collections.

DESIGN FROM ANTWERP

While production takes place in different ateliers internationally, the creative process begins at the XLBoom headquarters in Antwerp. Here, new ideas, concepts and collections are developed in close collaboration with designers, shaping the evolving universe of XLBoom objects.

CRAFTSMANSHIP

Many XLBoom objects are handmade, with great care devoted to materials, finishing and detail throughout the entire production process. XLBoom works with specialized ateliers around the world, combining traditional craftsmanship with contemporary production techniques. Subtle variations resulting from handcrafted production make each piece slightly unique.
